# Treatments

---

## Plasmabehandeling "Basis"

(introductory or express treatment aimed at minor corrections of skin imperfections)

**139 €**

## Plasmabehandeling "Advanced"

(targeted treatment of acne, rosacea, fine lines, deep wrinkles, crow's feet, skin pigmentation and more)

**179 €**

## Plasmabehandeling "Premium"

(the most complete treatment for skin problems with an intensive effect)

**219 €**

# PLASMADOUCHE

**With plasma shower you can locally correct age spots and dilated blood vessels. This treatment has a powerful rejuvenating and lifting effect on the skin.**

## **Indications:**

- Rosacea
- Pigmentation
- Sagging skin
- Fine wrinkles
- Acne
- Drooping eyelids
- Edema
- Herpes

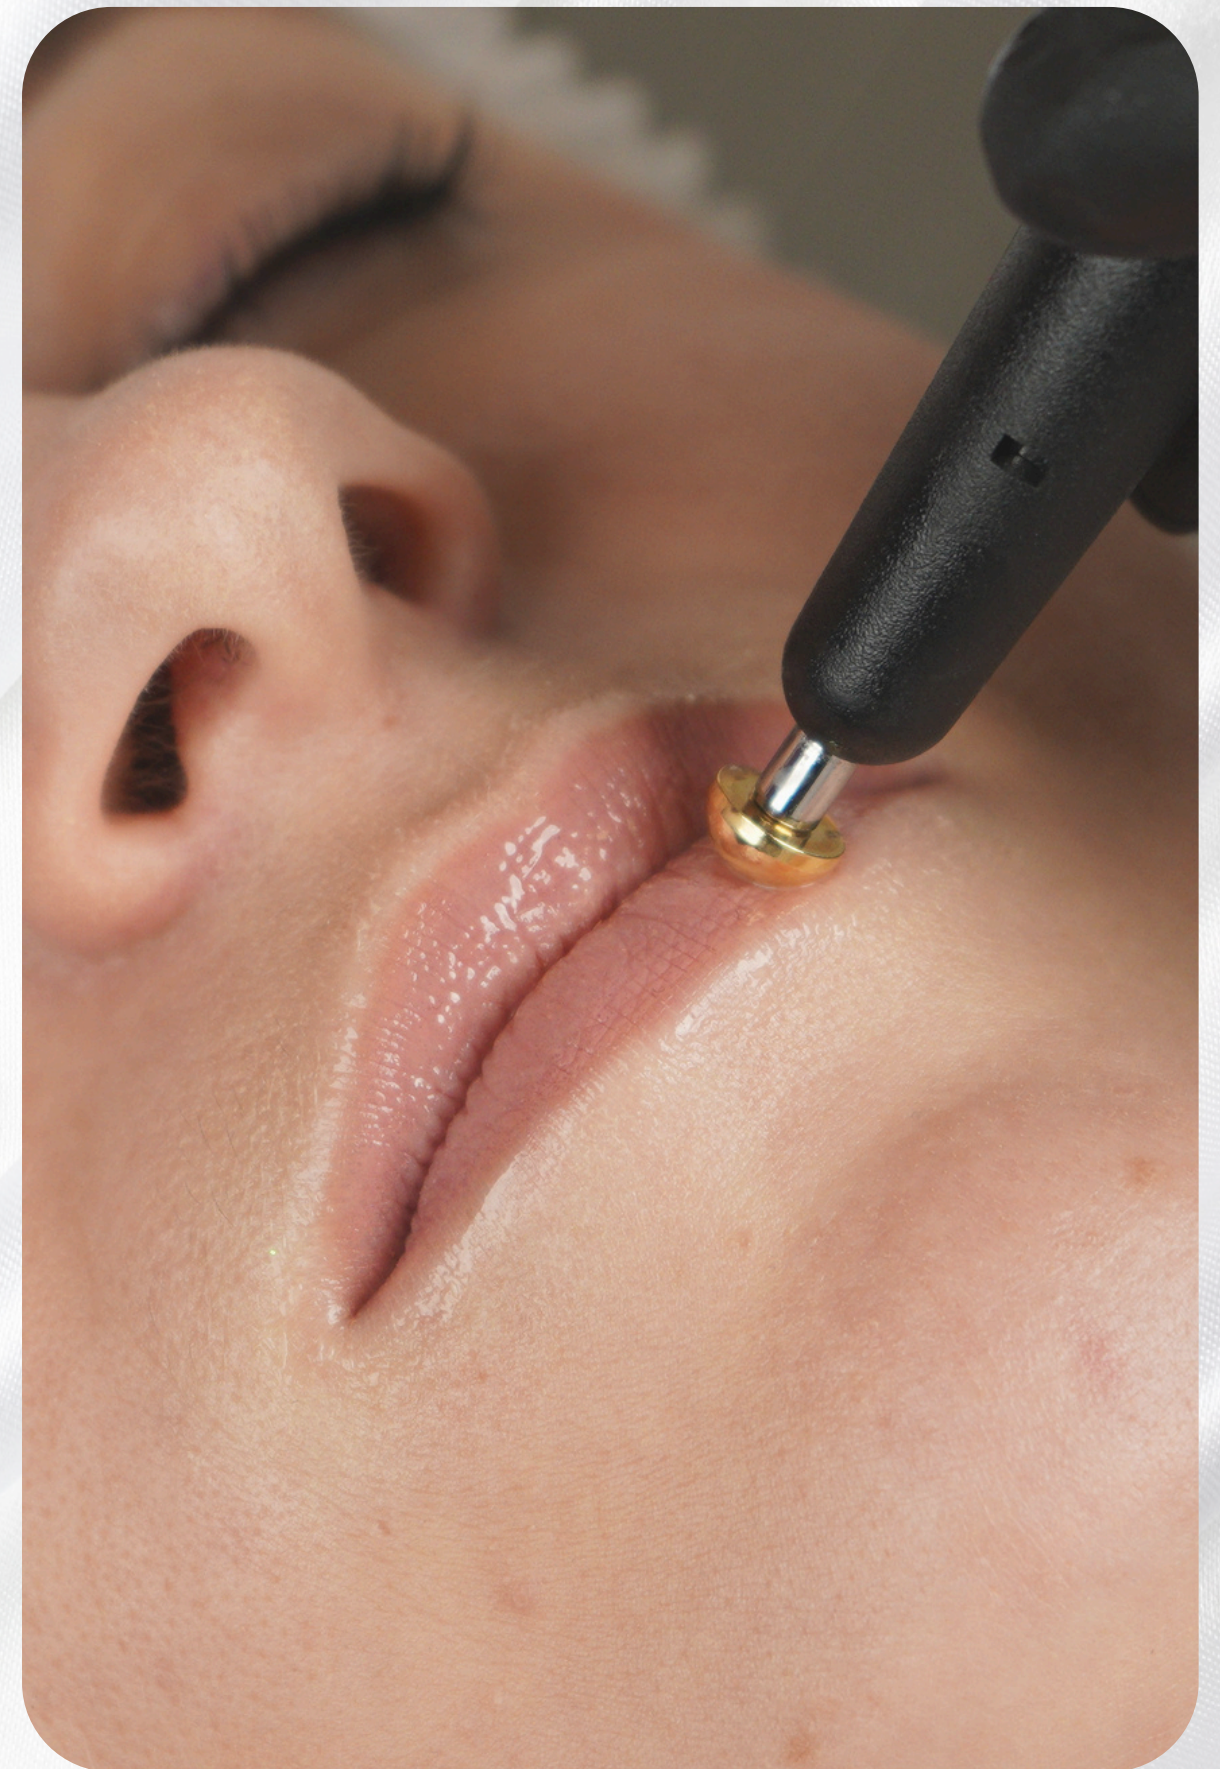

## **Contraindications:**

- Pregnancy
- Breastfeeding
- Pacemaker
- Epilepsy
- Cancer
- Unstable psycho-emotional state

**Course: 10-15 treatments**

**Interval: 7-10 days**

**Rehabilitation: none**

# PLASMA PORATION

## Mesotherapy without injections

**Deep transdermal administration of serums and mesococktail is an efficient treatment that quickly penetrates the skin without damaging the upper skin layers. The procedure is painless, does not cause discomfort and does not require rehabilitation, making it a comfortable option for the patient.**

### **Indications:**

- Uneven skin tone
- Sagging skin
- Fine wrinkles
- Dry skin
- Dermatological conditions
- Psoriasis

### **Contraindications:**

- Pregnancy
- Breastfeeding
- Pacemaker
- Epilepsy
- Cancer
- Unstable psycho-emotional state

**Course: 10-15 treatments**  
**Interval: 5-7 days**  
**Rehabilitation: none**

# MICROPLASMA THERMOLYSE

**Skin remodeling, pigmentation treatment, rejuvenation, lifting and much more. A procedure to stimulate the skin without damaging its integrity. Microplasma thermolysis allows to act on different layers of the skin: epidermis, dermis, muscles.**

## **Indications:**

- Small scars after acne (post-acne)
- Loss of skin elasticity
- Fine wrinkles
- Enlarged pores
- Reduced turgor and elasticity
- Small stretch marks

## **Contraindications:**

- Pregnancy
- Breastfeeding
- Pacemaker
- Oncological diseases
- Epilepsy
- General diseases in the acute phase
- Unstable psycho-emotional state

**Course: 8-10 procedures**  
**Interval: 10-14 days**  
**Rehabilitation: none**

# SUBLIMATION

**This is a modern method for treating superficial skin lesions. Plasma sublimation is performed using our advanced plasma device, which allows us to precisely adjust the depth and intensity of the treatment. Each sublimation procedure is preceded by an essential preparation step called biorevitalization.**

## **Indications:**

- Scars after acne
- Hyperkeratosis
- Enlarged pores
- Age-related changes
- Sagging upper and lower eyelids
- Striae
- Intimate rejuvenation
- Nose correction

## **Contraindications:**

- Pregnancy breastfeeding - Pacemaker
- Oncological diseases
- Epilepsy
- General diseases in the acute phase
- Unstable psycho-emotional state

**Course: 1-2 procedures**  
**Interval: 2-3 months**  
**Rehabilitation: 5-7 days**
