- Acute stage general diseases
- Unstable psychological and emotional condition

Course: 10-15 procedures
Interval: 5-7 days
Rehabilitation: none

Description of the Energy Line Methodology

Intensive transdermal administration of mesotherapy products utilizing plasma flow pressure generates temporary microchannels, facilitating the deep delivery of active ingredients into the skin.

Indications:

- Uneven skin pigmentation
- Diminished skin elasticity
- Delicate creases
- Dehydrated skin
- Dermatological disorders
- Psoriasis

Contraindications:

- Pregnancy, breastfeeding
- Pacemaker
- Oncological disorders
- Epilepsy
- Acute stage general diseases
- Unstable psychological and emotional condition

Course: 10-15 procedures
Interval: 5-7 days
Rehabilitation: none

Description of the Derma Fraction Technique

Dermal remodeling, melasma treatment, rejuvenation, and lifting are key components of this procedure, which stimulates the skin while preserving its integrity. It utilizes plasma to effectively target various layers of the skin, including the epidermis, dermis, and muscle.

Indications:

- Minor post-acne scars
- Diminished skin elasticity
- Delicate creases
- Dilated pores
- Acne
- Disruption of turgor and elasticity
- Minor striae

Contraindications:

- Pregnancy, breastfeeding
- Pacemaker
- Oncological disorders
- Epilepsy
- Acute stage general diseases
- Unstable psychological and emotional condition

Course: 8-10 procedures
Interval: 10-14 days
Rehabilitation: 3-5 days
